

# SEEDBURO 9000AG COMPUTER GRAIN SCALE

(Shown with optional cups 204, 203, 103 & 104)

Capacity: 0-2000 X 0.2g  
Test Weight & FM: 0.01 (Lbs./Bu Kg/Hl and %)  
Touchpanel Calibration  
Membrane Touch Panel  
Dockage readability to 0.01%  
Multiple cup selection  
2000 Gram Capacity  
2-year Warranty  
NTEP Certified Legal for Trade Applications  
Dimensions: 11-1/4" L X 8-1/4" W X 3-5/8" H  
Shipping dimensions: 18" L X 14" W X 12" H  
Actual weight: 7.2 lbs  
Shipping weight: 11 lbs

The Seedburo 9000AG Digital Grain Scale calculates dockage (foreign material) percentage, test weight results in pounds per bushel or kilograms per hectoliter and gram weight. The built-in memory allows samples to be stored and recalled, which makes calculating percentages simple. The 9000AG can be set-up for standard or reciprocal percent modes, cup selection (quart, pint or liter), active/frozen percent and test weight selection. It is NTEP certified and has RS232C interface for connection to a printer or computer. A triangular sample pan is included with each scale. New smaller footprint will fit in your grain lab with ease.
